Sat 7 August SOUTH	3-4	Huonville to Huon Island	AGM Weekend - Hobart
Sat 7 August		AGM and Dinner, Hobart	
Sun 8 August SOUTH	3-4	Gordon to Cockle Creek	

Ride Category Level Descriptions

AIM: Provide riders with an **indication** of typical conditions on a typical ride in this area.

Note: The categories take into account common ride conditions in the area, extent of experience required, fitness level required and/or a high need to manage fatigue, need to adapt to changing conditions on the day or respond to emergencies.

All rides are subject to changing conditions. Allocating categories so far ahead of the event is **based on likely conditions**. Further assessment closer to the event will be made and this may lead to the category level being raised and limiting the event to riders experienced in that category.

Category	Typical characteristics
1 - 2	• Generally calm conditions with small swell, if any. • Ideal for those who looking for an easy day to enjoy being on the ski • Good for those looking to build experience or learn more from group • Good for passengers (two up) • Don't generally require much gear other than the mandatory requirements of MAST and the Club
3 - 4	• Requires a bit more effort: small – medium swell likely • Expect some wind, which may exacerbate the swell • Could be longer distance, around 120-170kms: need capacity to carry sufficient fuel, suitable clothing food and water • Expectation that rider can keep up with group at 'cruising speed' • Rider needs experience & reasonable fitness to handle some (unexpected) deterioration in conditions • May not suit passengers for the entire day: monitor briefing info for changes on suitability. Ride Leader will determine passengers or not
5 - 6	• Hang on! This could get hairy.....! • <u>Must have proven experience on several rides of (at least) Category 3-4</u> • Long ride: reasonable to expect that conditions could deteriorate • Must be able to manage fatigue: need reasonable strength and fitness • Need skills to ride to conditions & manage fuel • Must be able to carry sufficient fuel, clothing, food, water (incl overnight stop somewhere if conditions demand) • May be expected to contribute to managing emergencies • Not suitable for passengers
